

Jake Ryan

College Station, TX, US | 123-456-7890 | jake.ryan.test@gmail.com | linkedin.com/in/jake | github.com/jake

PROFESSIONAL SUMMARY

Senior software engineer with 5+ years of sample experience delivering full-stack and backend products. Strong in Python, Java, TypeScript, React, REST APIs, PostgreSQL, Docker, and cloud-ready services. Experienced in leading projects, mentoring engineers, and collaborating with product and design partners.

EXPERIENCE

Senior Software Engineer

2021 - Present

Sample Technology Co. - College Station, TX (Remote)

- Led end-to-end delivery of full-stack product features using React, TypeScript, Node.js, REST APIs, PostgreSQL, and Docker.
- Designed Python and Java services that improved API reliability and supported asynchronous workflows with Redis.
- Mentored junior engineers through code reviews, pairing, and architecture discussions; partnered with design and product on delivery planning.
- Improved deployment quality through automated testing, CI/CD practices, observability, and containerized development environments.

Undergraduate Research Assistant

2020 - 2021

Texas A&M; University - College Station, TX

- Built a FastAPI and PostgreSQL REST API for learning-management-system data.
- Developed a Flask, React, PostgreSQL, and Docker application to analyze and visualize GitHub collaboration data.

Information Technology Support Specialist

2018 - 2021

Southwestern University - Georgetown, TX

- Supported campus technology, diagnosed hardware and software issues, and coordinated with staff to maintain dependable computing environments.

SELECTED PROJECTS

Gitlytics | Python, Flask, React, PostgreSQL, Docker, Celery, Redis - Developed a full-stack application with GitHub OAuth, asynchronous processing, and collaboration visualizations.

Simple Paintball | Java, Maven, Travis CI, Git - Built and published a Minecraft server plugin with 2K+ downloads and a 4.5/5 average review.

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, JavaScript, SQL, C/C++, HTML/CSS, R

Frameworks & APIs: FastAPI, Flask, React, Node.js, REST, PostgreSQL, Redis

Tools: Docker, Git, CI/CD, Google Cloud Platform, Travis CI, JUnit

Data: pandas, NumPy, Matplotlib

EDUCATION

Southwestern University - B.A. Computer Science, Minor in Business, 2021

Blinn College - Associate's in Liberal Arts, 2018
